SOC AUDIT AFFIRMS MVSC LEADS INDUSTRY IN DATA SECURITY
The Report Places the California-Based Electronic Vehicle Registration Firm at the Forefront of Compliance and Innovation in the Protection of Client Information

AGOURA HILLS, Calif., March 11, 2015 – [Motor Vehicle Software Corporation \(MVSC\)](#), the No. 1 electronic vehicle registration (EVR) provider in California¹, has successfully completed the Statement on Standards for Attestation Engagements (SSAE) No. 16 Service Organization Control (SOC) 1 Type II audit. The SOC 1 audit, which succeeds the former SAS 70 audit, demonstrates how MVSC continues to lead the EVR industry with its unparalleled data security controls and commitment to the protection of client data.

“In eight years, MVSC has propelled itself to the top of the California market and we now register nearly half the state’s new vehicles². With the regulatory and public concern over data security and privacy, we continuously strive to lead the way by choosing to operate at the highest available industry standards. As we expand nationally, we remain driven to continuously reevaluate, evolve and improve our software solution so our clients can be sure they’ve partnered with the most innovative and secure electronic vehicle registration provider,” said Don Armstrong, President and CEO, MVSC. “Our SOC 1 results give our partners complete and continued confidence that our data security measures are unrivaled in the industry.”

Conducted in accordance with [American Institute of Certified Public Accountants \(AICPA\)](#) guidelines, the audit assesses MVSC’s storage, handling and transmission of data, as well as its design and operational effectiveness of internal controls and processes for financial reporting, information security, processing integrity and management.

About Motor Vehicle Software Corporation
